

ColorJoint Compact Laminate Countertop Joint Sealant

ColorJoint

Key Features:

Include ColorJoint color matched adhesive with every Compact Laminate countertop sale. One is required per mitre joint to ensure correct joint installation.

Compact laminate countertops are an emerging market trend that offer great impact and moisture resistance, and are hardwearing and easy to clean.

- ColorJoint is a new color matched quick grab adhesive and sealant for Compact Laminate countertops.
- ColorJoint is the latest generation, high performance toughened polymer technology. It is a super strength formula, tough and fast curing and has excellent bond strength, giving instant grip without support.

- Product is color matched to countertop to give a seamless finish. It is available in 6 popular colors.
- ColorJoint is an excellent gap or joint filler, has very little shrinkage, and is UV stable. It lasts longer in the joint and does not pick up dirt like silicone.
- ColorJoint is fast curing even at low temperatures, this means worktops are ready to use in 4 hours.
- It is environmentally friendly, containing no solvents. There is no smell or fumes during or after installation.
- ColorJoint has a 12 month shelf life (unopened and stored per recommendations)

Directions for Use:

Ensure the area to be sealed is dry and free from dust and grease. Apply a bead around the leading edge of the joint and the bolt slots. Quickly bring the countertops together allowing the excess sealant to squeeze out of the joint, align the two sides and tighten the bolts fully. The excess sealant should be removed with the applicator or a spatula and then cleaned with a clean cloth wiping across the joint. Allow to cure for 4 hours before use.
